### **New Method of Extracting** Turpentine and Resin.

The greatest potential source of turpentine and risen chemicals lies in British Columbia, says E. S. Oliver, an industrial chemist and specialist in wood products, after investigations in Hold Vory Important September Mexico and Central America and in the forests of Russia, Sweden, Germany and the Mediterranean countries. He has made a study of methods of extracting the maximum amount of growing tree, and his observations are attracting considerable attention among persons identified with the developing of the resources of British Columbia.

Mr. Oliver points out that the very first ship which came from England to the shores of America bore instructions, written in the hand of Queen Elizabeth, as to the method to be employed in obtaining tree resin. "And' he adds "curiously enough, on this continent the very same mothods are still followed. It is an industry which has shown no improvement in its methods of collecting its raw material."

Under the old system of scarifying the barks of trees and collecting the resin after the more volatile elements had become oxydized by contact with the air, it was not possible to get more than 17 1-2 per cent bulk turpentine. In Canada the highest production in any of the eastern plants was 15 1-2 James E. Miller and wife to Boyd per cent. Under Mr. Oliver's tests. cent, or 1 per cent higher than in Germany, where the resin by-product industry has been developed to an art. Mr. Oliver achieves his result by boring a small hole into the tree trunk and hermetically sealing it to an airtight flask. In this way, instead of in-S. Hickok, 270 acres in Sec. 6 and 5 jury being done to the timber, the growth of the tree is aided, as the resin is a substance of which the tree is seeking to rid itself,0

> It is estimated that a block of about 100 acres of Douglass fir gives about 800 barrels of pitch a year, or a total of turpentine and other resin products ferry as footman. now is four times that of prewar days, -Indianapolis News.

The Strong Withstand the Winter Cold Better Than the Weak

You must have Health, Strength and Endurance to fight Colds, Grip and Influenza. When your blood is not in a healthy condition and does not circulate properly, your system is unable to withstand the Winter cold.

**GROVE'S TASTELESS CHIII TONIC** 

Fortifies the System Against Colds, Grip and Influenza by Purifying and Enriching the Blood.

It contains the well-known tonic properties of Quinine and Iron in a form acceptable to the most delicate stomach, and is pleasant to take. You can soon feel its Strengthening, Invigorating Effect. 60c.

The Strong Withstand the Heat of Summer Better Than the Weak

Old people who are feeble and younger people who are weak, will be strengthened and enabled to go through the depressing heat of snarner by taking GROVE'S TASTELESS chillTONIC. It purifies and enriches the blood and builds up the whole system. You can soon feel its Strengthening, Invigorating Effect. 60c.

#### RED CROSS ASSISTS DISABLED VETERANS

The American Red Cross is carrying on a wide program of service for the disabled World War veterans receiving treatment in United States Public Health hospitals, and those being trained through agencies of the Federal Board for Vocational Education.

In each of the Public Health Service hospitals Red Cross workers devote their time to the general welfare of the service men from the day they enter the receiving ward until they are discharged. After the soldier's discharge the Red Cross continues its friendly service through the Home Service Section in his own community.

The Red Cross maintains a convales cent house at all of the hospitals. where patients can amuse themselves after they are well enough to be up and around. Parties and picture shows in the wards are also fur shed, with occasional excursions when convales

cence comes, Great service has been rendered by the Red Cross in mental cases in identifying those who have appeared in state hospitals for the insane, and helping them secure compensation due from the Bureau of War Risk Insurance,

In the Federal Board's various district offices the Red Cross worker, acting with the Home Service Section, makes necessary loans to the men, arranges suitable living conditions, helps collect evidence and supply facts to the Board, assists in "appealing cases" and settles various personal difficulties for the men. The workers also follow up and aid all men who discontinue train-

The Red Cross agents find men "lost to the Board, help clear up delayed cases and aid the college counselors in their friendly work with the men. Many Red Cross chapters have set up recreation facilities, and in some instances living clubs, so these victims of war may have attractive surroundings and the fun which must go with effective school work.

To the American Red Cross Institute for the Blind near Baltimore, Md., more than half of all the Americans blinded in the World War have come for training. The Institute, through the Red Cross, long ago conducted an exhaustive industrial survey to deter mine the vocations for which blind men could be fitted. As a result it is putting forth well trained men equipped to meet the social, civic and economic requirements of their respective

## AMERICANS ABROAD IN RED CROSS WORK

United States Citizens Far Away Enthusiastic Members of the "Fourteenth" Division.

Among the most enthusiastic and energetic members of the American Red Cross are those citizens of the United States who live outside the continental boundaries of their country sons and daughters of the Stars and Stripes residing at the far corners of

These people compose the Insular and Foreign Division of the parent organization, generally known as the "Fourteenth" Division, which has jurisdiction of all territory outside the country proper; that is, Alaska Porte Itleo, Hawaii, Virgin Islands, the Philippines, Guam, and even the is Phillippines, Gunni, and even the is land of Yap, which came under our flag as a result of the world war. For the year 1920 this division reported 20,808 paid up members.

The main object of this division is to give our citizens everywhere the opportunity to participate in the work of the organization which stands for the best national ideals. Americans m far places intensely loyal and patriotic, treasure their membership in the Red Cross as the outward expression of their citizenship. It is another tie to the homeland and to each other. There are chapters of this division in Argentine, Bolivia, Brazil, Canal zone, Chile, China, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, Guam, Guatemala, Haiti, Hawaii, Honduras, Japan, Manchuria, Netherlands, Nicaragua, Paraguay, Peru, Philippines, Porto Rico, Siberia, Spain, Sweden, Switzerland, Syria, Turkey, Uruguay. During the war

Venezuela and Virgin Islands, these scattered members of the Red Cross contrib-uted millions in money, and millions of dollars' worth of necessary articles for the men in service, and sent many doctors and nurses to France. At the same time they carried on an excellent Home Service in their respective communities for the families of those who had gone to war, and in some regions gave large sums of money and immensurable personal service to the relief of disaster and disease victims.

The division is now establishing service clubs in foreign ports for the benefit of sailors in the American Merchant Marine, making plans to aid Americans in trouble in foreign lands and completing arrangements for giving immediate adequate relief in case of disaster.

It is the Fourteenth Division's part in the great Peace Time program of the American Red Cross.

Boys and girls get your books ready for school Monday. Hurrah.

## CARD OF THANK.

We take this method of extending our thanks to those friends and neighbors who so kindly assisted in the last sad rite of our son, Clarence Alexander Forbes, who made the supreme sacrifice at Liverpool, England, on Oct. 22, 1918, and whose remains were brought to his old home for final inter-

nent. The members of Company A, 114th Ammunition Train; the Red Cross, the member of the Choir, the Rector and the ladies of the Episcopal Church, and all others who were so kind and attentive, have our most sincere and grateful blessing.

Respectfully. MR. AND MRS. G. W. PARSLEY, Sept. 7, 1920.

#### FRENCH PRAISE FOR OUR RED CROSS WORK

Lauding the work accomplished by American philanthropy for warstricken France, Andre Tardieu, former high commissioner from that nation to the United States, in a recent article widely commented on throughout the French press, says:

"The American Red Cross has acheartfelt gratitude of every true Frenchman. In 1918 this great relief organization spent in behalf of France nearly 87,000,000 francs, and in 1919 its expenditures on charitable projects in our country attained the tremendous total of 171,000,000. It has recently turned over to the French relief organizations huge stocks of supplies whose value must be counted in the hundreds of thousands of francs.

"Fifteen million American boys and girls, handed together in the Junior Red Cross of America, are back of a movement to establish the closest ties between themselves and France's younger generation through the chartrable works they have financed, and are now carrying out among our little war sufferers.

"The bonds of friendship between France and America is cemented with mutual admiration, respect and gratitude."

## NATIONWIDE FIGHT AGAINST DISEASE

American Red Cross Will Have Health Centers in All Parts of United States.

The American Red Cross has launchfighting disease and physical defect among the American people. A new and unique health institution has come into being as the result of several months' study by the Red Cross Health Service Department at National Head-

Officials in charge of the department predict that before long this new health activity will be in actual operation all over the country, and that the sign-"American Red Cross Health Center" will become as familiar to the peode everywhere as are now the signs of the telegraph companies.

Busy Long Before War.

The interest of the American Red Cross in the fight against disease is ot, however, of recent origin. Long before the war the organization began this health service through its m units in disaster relief work and its department of Town and County Nursing. During the war and following the armistice thousands of American Red Cross officials have been fighting disease in the war-stricken countries At the same time tens of thousands of local Red Cross officials have been en gaged at home fighting disease, notably during the influenza epidemics.

The American Red Cross has determined that all this valuable experience in health service abroad and at home shall not go to waste. So long as there are a half a million people dying yearly in this country from preventable causes, and so long as more than one-third of the American children and young people are victims of physical defects, the Red Cross recognizes the urgent need for continued

How Organization Works. The Red Cross Health Center is governed by business principles, applies business methods, and, in its more simple form, can be established and conducted by thy people.
